计算机导论-第三次作业收集

姓名部分请填写的格式为：学号-姓名

1 Briefly summarize the steps performed by each of the four layers in the TCP/IP hierarchy at the computer at which a message originates.

2. For a wireless network, why the CSMA/CD protocol is not applied?

3. Write the entire URL required to retrieve the Web document named bulldogs.html from the Web server at animals.org assuming that the document is stored in the directory named dogs.

4 What are some distinctions between UDP and TCP?

5. Draw a sketch showing how the following HTML document would appear on the computer screen when displayed by a browser.

```
<html>
<head>
<title>This is the title</title>
<style>
body {color:blue;}
h1 {color:red;}
p.ex {color:green;} </style></head>
<body>
<h1>Favorite Animals</h1>
<p>Of all the animals in the world, the
<a href="http://pigs.org/pigs.html">pig</a> is perhaps the most charming.</p>
<p class="ex"> However, the
<a href="http://hippopotamuscity.org/hippo.html">
hippopotamus</a> is also cute.</p>
</body>
</html>
```

6 Can we use IPv4 when its IP addresses ran out ?
